How to play

The game board is the multiplication table.

The players get a scavenger card each. They take turns rolling two 10-face dice. They multiply their numbers with the help of the table and mark the picture that is behind that number on their scavenger card. The winner is the first player to mark/get all 10 pictures on their card. If a player gets a number with a picture already marked on their card they just wait for their next turn. Since the products on the table repeat, the players try to find the product that helps them get the pictures they need.
